GA - Metrics

Lionel Messi vs Cristiano Ronaldo

This comparison is made solely for analytical purposes and does not account for a player's full contribution to team play. Elements such as passes, dribbles, shots, defensive actions, and overall influence on the pitch are not included.

This analysis does not determine who the best player is. Even if someone tries to use it that way, the information is biased because neither player has finished their career, and major competitions — including the World Cup — are still ongoing.

My goal is simply to share data for people who enjoy football as much as I do. This information is meant to be used in friendly, informal debates.

Thanks for the support.
